

# DAVID RUSHTON

CMIOSH TIFSM

## PROFILE

I started my health and safety journey over 15 years ago in the specialty chemical industry. My first roles were quality based, but as my experience grew, I naturally progressed into a combined role. This led me to becoming an expert point of contact for all safety and health related issues within the organisation.

Academically, my qualifications enabled me to build on the experience and skills I had acquired to demonstrate competence in my field. Continual professional development has helped me to achieve a career goal of becoming a chartered member of the Institute of Occupational Safety and Health and I continue to strive to achieve a comprehensive understanding of all subject matter relating to my chosen profession.
